

RESPONSE TO CONSULTANT QUESTIONS

May 26, 2022

1. Since that 2006 report, were any of the “next steps” (e.g. determine favored alternative, soils testing, public surveys, soil testing, etc) identified in it performed?

The only next step taken was public surveys. They were overwhelmingly negative due to cost.

2. Is the study area identified in that report the same as what is under consideration for this one?

This study is only for the area already served by the Shaftsbury Water System with the exception of Twitchill Hill Road and North Bennington Road (VT 67) west of MV-22 as marked on the map from OCE on the Shaftsbury webpage under bids.

3. I didn't see any maps included in the 2006 report (I did find the OCE water map). Were there any maps prepared for that study that are available for review?

Seven maps from the 2006 Study are now posted on the Town webpage under bids
